

The City of Athens is aware of the importance of reducing waste for healthy lives, a healthy environment, and a healthy economy.

We pledge to strive for Zero Waste!

Over the next six months, we aim to accomplish the following goals:

- Standardize recycling access and signage for city employees and visitors to city buildings
- Improve internal communication about recycling practices through employee training
- Create a city-wide zero waste policy outlining the expectations for event organizers using city spaces
- Put in place policies applying to all city buildings that promote zero waste and institutionalize zero waste practices
