

As a business that is aware of the importance of reducing waste for a healthy environment, a healthy economy, and healthy lives,

We pledge to strive for ZERO WASTE.

Over the next year, we aim to accomplish these goals:

- Adopt new signage to improve communication with guests about recycling and composting.
- Enact a new policy of zero waste for visitors.
- Create a card for guests to take home with them as zero waste reminders when they do something out of line with the zero waste policy.
- Rural Action will collaborate with Blue Rock Station on a Free School workshop about organizing zero waste events and lifestyles, including a hands on portion for making signs out of recycled material.
